

Organizers: Representative

Prof. Toshihiro Okabe

(Kindai University)

Prof. Akito Takasaki

(Shibaura Inst. of Tech.)

Co-Organizers

Prof. Toru Fujii (Doshisha University)

Prof. Koichi Goda (Yamaguchi University)

Prof. Shuji Yoshizawa (Meisei University)

Dr. Toshikazu Suda (MituzawaECOTech.Lab.)

Dr. Kiyoharu Fukuda

(Tokyo University of Agriculture and Technology)

Prof. Yuko Nishimoto (Kanagawa University)

Dr. Koji Adachi (Akita Prefectural University)

Dr. Takahisa Nakai (Shimane University)

Dr. Hiroki Mano

(National Institute of Advanced Industrial Science and Technology)

Dr. Yoshikazu Shinohara

(National Institute for Materials Science)

Dr. Kenichi Nakajima

(National Institute for Environmental Studies)

Mr. Shuetsu Saito

(Forestry and Forest Products Research Institute)

Prof. Kazuhiko Kakishita (Polytechnic University)

Prof. Hiroataka Shimizu (Polytechnic University)

Dr. Masahiro Sadanari (Polytechnic University)

Dr. Keisuke Hata (Chiba Polytechnic Center)

Mr. Junichiro Tsuji (Ibaraki Polytechnic Center)

Dr. Hiroyuki Mito (Advanced Polytechnic Center)

Mr. Sensho Honma

(Hokkaido Forest Products Research Institute)

Dr. Shiro Aratake

(Miyazaki Prefectural Wood Utilization Research Center)

Mr. Keisuke Kikuchi

(Industrial Research Institute of Shizuoka Prefecture)

Mr. Hiroyuki Ono

(Aomori Prefectural Industrial Technology Research Center)

Dr. Ayumi Takemoto

(National Institute of Technology, Okinawa College)

Dr. Osamu Yoshimura (Kanazawa Institute of Technology)

Correspondence

Dr. Tadashi Ohtani (Tokyo Gakugei University)

Dr. Koji Fukuda (Kindai University)

Dr. Kazuhiko Ogawa (Shimane Polytechnic Junior College)

Dr. Yoshimi Kishimoto (Ochanomizu University)

SCOPE:

There has been a strong demand for environmentally friendly products in the globe. It is a product results minimum environmental impact after each process of design, production, and disposal,. From daily necessities such as stationery and food to vehicles or distributed power plug in houses, it has sought to manufacture in a wide range of products. A full utilization of biomass resources in the production of environmental friendly goods and in the recycling processing technology is strongly demanded. With a focus on biomass utilization, we would like to incorporating non-biomass material to produce multi-disciplinary eco products . In addition, production of environmentally friendly products other than using biomass resources are also demanded in the world. Hence, recycling materials at cheaper cost with is highly recommended. This session aims to promote environmentally friendly products.

Topics:

1. Ecoproducts, 2. Ecomaterial, 3. Renewable resources, 4. Recycling, 5. Biomass
